

How to Properly Wear a Mask?

Your child's mask must be properly adjusted so that it covers **their nose, mouth and chin.**

To Avoid

Your child's mask must not **rest under their nose** or **above their chin.**

It should not be **worn around their neck** or **hanging from one ear.**

Children under 2 must **NEVER wear a mask** to avoid any risk of suffocation.

When is the mask mandatory for children?

- **From 10 years of age** in public transit and enclosed public places (e.g., stores and public transit).
- **At school starting in grade 5**, when going from one room to another, in hallways and the lobby, for example. It is also mandatory in school buses.

Children do not have to wear their masks in their classroom, at their daycare centre or at home.

It is also recommended, but not mandatory :

- **For children between 2 and 9** when they are in public transit or enclosed public places (e.g., stores and public transit).
- **Outdoors**, when maintaining a distance of 2 metres between individuals is not possible.

Once removed, reusable fabric masks should be placed inside a bag and washed once you get home. Dispose of non-reusable masks in a garbage bin as soon as you are done with it.
